This diagram shows an exploded view of a mechanical assembly. The main component is a large, complex housing (part 22) with a central circular opening. Various bolts and nuts (parts 18, 20, 23, 24) are shown being inserted into the housing. A long, curved arm (part 10) is attached to the bottom of the housing via a pin (part 12) and a nut (part 13). The arm has a foot (part 11) at its end. A smaller, curved arm (part 14) is also shown, with a foot (part 15) at its end. A separate assembly (parts 1, 2, 3, 4, 5, 6, 7, 8, 9) is shown on the right, which appears to be a control mechanism or a sensor. This assembly includes a lever (part 1) with a foot (part 11), a pin (part 2), a nut (part 3), a bolt (part 4), a washer (part 5), a spring (part 6), a pin (part 7), a bolt (part 8), and a nut (part 9). The diagram is labeled with a large, diagonal watermark reading "ENTERPRIS".

This diagram illustrates the assembly of a vehicle's rear suspension and brake system. The components are numbered as follows:

- 1: Brake master cylinder
- 2: Brake line
- 3: Brake line fitting
- 4: Brake line
- 5: Brake line fitting
- 6: Brake line fitting
- 7: Brake line fitting
- 8: Brake shoe
- 9: Brake shoe pin
- 10: Brake shoe pin
- 11: Brake line fitting

The diagram shows the master cylinder (1) connected to the brake line (2), which then branches into two lines (4 and 5) leading to the brake caliper (3) and the brake shoe (8). The brake caliper (3) is shown with the brake pads (9 and 10) and the brake disc (7). The brake shoe (8) is shown with the brake pads (9 and 10) and the brake disc (7). The brake line (4) is shown with the brake line fitting (11).
